

SHAP Waterfalls — How the Model Builds Each Prediction (base = \$13,356)

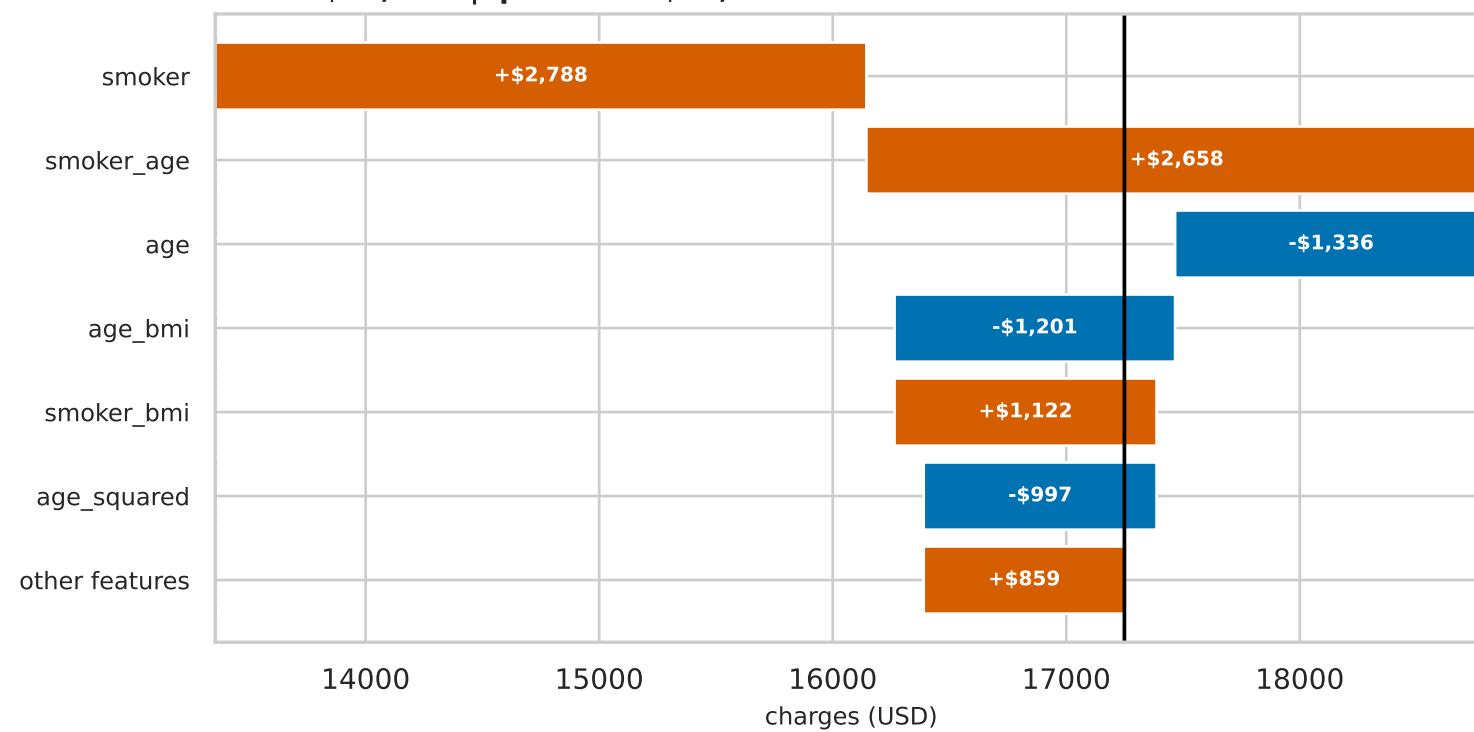

**(a) Young non-smoker,
normal BMI**
actual \$2,709 | predicted \$4,363

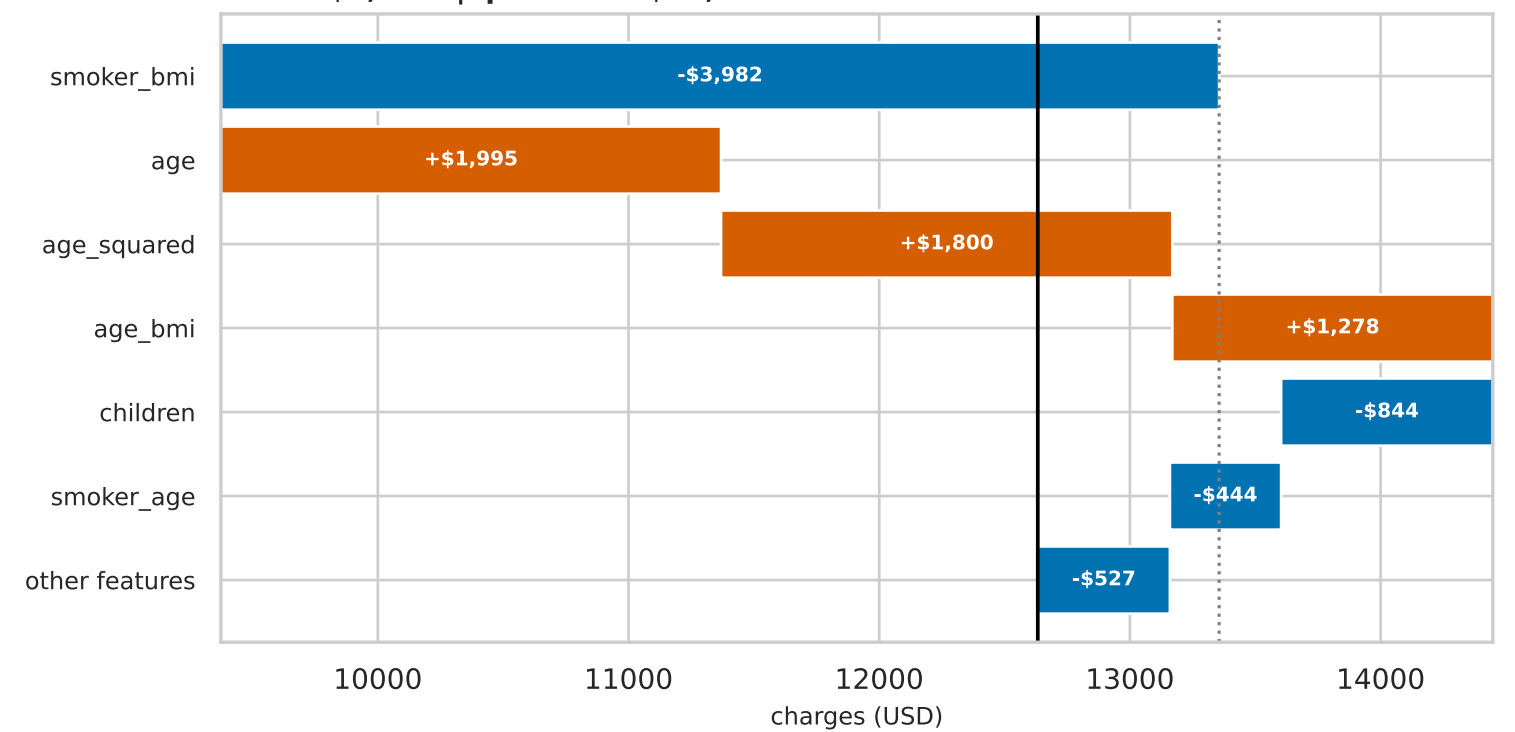

**(b) Older smoker,
high BMI**
actual \$42,000 | predicted \$42,667

**(c) Young smoker,
normal BMI**
actual \$15,359 | predicted \$17,249

**(d) Older non-smoker,
high BMI**
actual \$9,504 | predicted \$12,633

**(e) Middle-aged,
3+ children**
actual \$10,097 | predicted \$9,603
